

HELP A BIRD BUILD IT'S NEST

1. Hang a pinecone on a string outside with bits and pieces of yarn, straw, little strips of material, etc. stuffed into it.
2. Take a mesh bag (such as apples or potatoes come in) and put in your fluff from the dryer vent. Hang outside in a protected area.

The birds will use these items to make themselves a nice, soft nest. Try to hang these somewhere where you can watch the fun. Later look around for nests and see if you can identify the items that you provided.
